

Customer Behaviour Analysis

A structured retail/e-commerce dataset used for customer behavior analysis and business decision-making for exploring purchase patterns, segmentation, and revenue optimization through Python EDA, SQL, and Power BI.

About the Dataset

This dataset provides a detailed look into retail e-commerce customer behavior, structured at the transaction level. It's designed for advanced analytics, helping to uncover purchasing patterns, demographic influences, and payment preferences.

1

Records

Approximately **5,000 unique transactions**, representing a diverse customer base.

2

Key Features

- Customer Demographics (Age, Location)
- Purchase Details (Amount, Category, Previous Purchases)
- Transaction Specifics (Payment Method, Season)

3

Data Types

Mix of numerical (integers, floats) for quantities and categorical (strings) for attributes, ensuring comprehensive analysis.

Why This Data Matters

High-Value Customers

Identify frequent buyers and one-time purchasers

Purchase Patterns

Understand what, how often, and how much customers buy

Discount Strategy

Optimize promo codes and campaign effectiveness

Customer Lifetime Value

Increase CLV through targeted retention efforts

Business Problems to Solve

Low Customer Retention

Who are frequent buyers vs. one-time buyers?

Ineffective Marketing Campaigns

Do discounts increase purchases? Which customers respond to promo codes?

Product Demand Understanding

Which category performs best? Which products generate the highest revenue?

Payment Behavior Insights

Which payment methods are preferred? Are digital payments increasing?

Seasonal Demand Variation

Does season impact sales? Which season drives maximum purchases?

Customer Segmentation

Identify high-value, frequent, and discount-sensitive customers

Data Dictionary

Customer ID	Unique identifier for each customer
Age / Gender	Customer demographics
Item Purchased / Category	Product & category (Clothing, Electronics, etc.)
Purchase Amount	Amount spent by the customer
Location	Customer's geographic location
Size / Color	Product size (S, M, L) & color
Season	Season of purchase (Winter, Summer, etc.)
Review Rating	Customer rating for the product
Subscription Status	Whether customer is subscribed (Yes/No)
Shipping Type	Type of shipping selected
Discount Applied	Whether discount was applied
Previous Purchases	Number of past purchases
Payment Method	Mode of payment
Frequency of Purchases	Purchase frequency (Weekly, Monthly, etc.)

EDA — Exploratory Data Analysis (Python)

Load Data

Initial Exploration

Data Cleaning

Export to SQL

Key cleaning steps included: category mapping corrections, smart imputation (product-level mean for ratings, mode for clothing sizes, zero for new customers), duplicate removal, and column standardization for SQL/Power BI compatibility.

SQL Analysis — Revenue & Discounts

Key Findings

- **Electronics** leads revenue at \$486K
- Discounts **increase avg. purchase**: \$219 (discounted) vs. \$182 (no discount)
- Subscribers spend **63% more**: \$270.58 avg vs. \$165.72 for non-subscribers
- Male: \$391K · Female: \$352K · Other: \$251K revenue

Customer Segmentation & Age Insights

Segmentation Logic

Customers segmented by previous purchases into **Loyal** (3,085), **Returning** (1,354), and **New** (561).

Revenue by Age Group

- ♦ **51+:** \$399K (40.2%)
- ♦ **36-50:** \$267K (26.8%)
- ♦ **26-35:** \$177K (17.8%)
- ♦ **18-25:** \$151K (15.2%)

Repeat buyers (5+ purchases) show strong subscription uptake: **1,190 subscribed** vs. 2,763 not subscribed.

Power BI Dashboard — Key Metrics

Average Rating

994K

Total Spend (\$)

198

Avg. Spend (\$)

Highlights

- **Revenue by Gender:** Male \$391K (39.3%), Female \$354K (35.4%), Other \$251K (25.3%)
- **Top Locations:** New York \$144K, Los Angeles \$126K, Phoenix \$119K
- **Seasonal:** Spring \$244K leads; Fall lowest at \$68K
- **Shipping:** Standard (1,199 orders) vs. Express (avg. \$358/order)

Key Takeaways

Electronics Dominate

Highest revenue category at \$486K — focus inventory and marketing here

Discounts Raise AOV

Discounted orders average \$219 vs. \$182 — target strategically

Loyal Customers Lead

3,085 loyal customers drive the majority of repeat revenue

51+ Age Group Spends Most

\$399K revenue — highest-spending demographic by far

Subscribers Spend 63% More

\$270 avg vs. \$166 — subscription programs boost lifetime value

Recommendations

Customer-Centric Growth

Targeted marketing efforts, loyalty programs, and product recommendations can be developed by leveraging insights from **Customer Lifetime Value (CLV)** and **Age Distribution** analysis. Focus on nurturing high-value segments.

Optimized Product & Inventory

Prioritize stock replenishment for **Top 5 Most Purchased Items** and invest in high-performing **Product Categories**. This ensures availability and maximizes sales from popular offerings.

Enhanced Marketing Effectiveness

Align promotional calendars with **Seasonal Purchase Trends** to capitalize on peak demand. Continuously evaluate the **Impact of Discounts** to optimize campaign profitability and customer acquisition costs.

Valuing Subscription Programs

Quantify the long-term value of subscribers and invest in strategies to increase **Subscription Status**. Highlight exclusive benefits to incentivize sign-ups and improve retention, driving predictable revenue.

Streamlined Payment Experience

Ensure seamless integration and prominent display of preferred **Payment Methods** to reduce checkout friction and improve conversion rates. Consider adding new options based on emerging trends.
